SCIENTIFIC CONFERENCE

2024

Dedicated to

The architect of our independence

Father of the Nation

Bangabandhu Sheikh Mujibur Rahman

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

PRESIDENT
PEOPLE'S REPUBLIC OF BANGLADESH
BANGLADESH, DHAKA

11 Falgun 1430
24 February 2024

Message

I welcome the collaborative efforts of the Bangladesh Cardiovascular Research Foundation (BCRF) and Interventional Academy, USA in organizing the International Scientific Conference on heart disease.

Heart disease affects millions of people globally including Bangladesh. The World Health Organization (WHO) has recognized it as leading cause of death worldwide. The BCRF can play pivotal role in raising awareness and preventing heart disease in Bangladesh where cardiovascular diseases account for a substantial percentage of total deaths. The youth of Bangladesh, in particular, are at risk, necessitating our unwavering attention and immediate action.

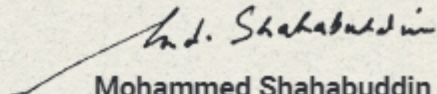

In the visionary footsteps of our Father of the Nation, Bangabandhu Sheikh Mujibur Rahman, the healthcare system was revolutionized post-independence. His comprehensive action plan, establishing medical colleges, hospitals, and research institutes, laid the foundation for a resilient healthcare infrastructure. Under the dynamic leadership of Prime Minister Sheikh Hasina a remarkable transformation in the treatment of heart disease has taken place. Specialized hospitals providing world-class treatment equipped with cutting- edge technology are now accessible across the country.

I think this conference will be a testament to our commitment to continuous improvement in cardiovascular care. I hope it can serve as a platform for knowledge exchange, innovation, and collaboration among experts from diverse backgrounds. Embracing the advancements in medical science and fostering international partnerships, we need to redefine the landscape of cardiovascular health in Bangladesh.

I extend my gratitude to all participants, organizers, and facilitators for their dedication in making this event a success. May the deliberations be fruitful, the collaborations be impactful, and the outcomes be transformative. I wish you all a successful and enlightening conference.

I wish the conference a grand success.

Joi Bangla.
Khoda Hafez, May Bangladesh Live Forever.

Md. Shahabuddin
Mohammed Shahabuddin

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

PRIME MINISTER
GOVERNMENT OF THE PEOPLE'S REPUBLIC OF
BANGLADESH
11 Falgun 1430
24 February 2024

Message

I am happy to learn that the International Scientific Conference on Heart Disease is going to be held in the capital, Dhaka, on February 23-24, 2024, under initiative of Bangladesh Cardiovascular Research Foundation (BCRF). I underscore the immense importance of this International Scientific Conference and extend my warm greetings to all of the scholars participating here.

Heart disease, as a leading global health concern, demands our unwavering attention. The collaboration between these esteemed organizations reflects our shared commitment to tackling this pervasive issue, and I commend all participants for their dedication to advancing cardiovascular health.

The BCRF has been instrumental in raising awareness about heart disease nationwide, bridging the gap between urban centers and remote villages. The statistics highlighting the prevalence of cardiovascular diseases and their impact on our youth underline the urgency of our collective efforts.

In the aftermath of our war for independence in 1971, the Greatest Bengali of all time, the Father of the Nation, Bangabandhu Sheikh Mujibur Rahman, recognized the need for a comprehensive healthcare system. His visionary approach led to establishing medical colleges, hospitals, and research institutes, laying the groundwork for developing our healthcare infrastructure.

Under our government's leadership, a significant transformation has been made in treating heart disease. World-class, specialized hospitals are now accessible nationwide, providing cutting-edge technology treatment to millions of patients. This elevates the standard of care and contributes significantly to our nation's economic well-being.

This conference serves as a platform for knowledge exchange, collaboration, and the exploration of innovative solutions in cardiovascular medicine. It is a testament to our collective determination to enhance patient care and address the evolving challenges of heart disease.

I extend my heartfelt gratitude to the organizers, collaborators, and participants for their tireless efforts in making this conference a reality. Your dedication to advancing medical science and improving the lives of our citizens is commendable.

May the deliberations during this conference be marked by insightful discussions, fruitful collaborations, and the generation of knowledge that will pave the way for a healthier and more resilient Bangladesh.

I wish you all a successful and impactful International Scientific Conference.

Joi Bangla, Joi Bangabandhu
May Bangladesh Live Forever.

Sheikh Hasina

Dr. Samanta Lal Sen
Minister
Ministry of Health & Family Welfare
Govt. of the People's Republic
of Bangladesh

Message

It is with great pleasure and a sense of shared purpose to address this distinguished assembly of medical professionals, researchers, and stakeholders in the healthcare sector.

In recent years, we have witnessed remarkable strides in healthcare in Bangladesh and special thanks to the visionary leadership of Honorable Prime Minister Sheikh Hasina. The establishment of specialized hospitals and the emphasis on providing world-class treatment have significantly improved the landscape of healthcare in our nation. This conference would play a pivotal role in ensuring that our medical professionals are equipped with the latest knowledge and skills to deliver optimal care to our citizens.

I commend the organizers, sponsors, and participants for their dedication to making the conference a reality. Your contributions are integral to our collective mission of advancing medical science, improving patient outcomes, and fostering a healthier nation. As the Minister of Health and Family Welfare for the Government of Bangladesh, I am deeply appreciative of the pivotal role played by the Bangladesh Cardiovascular Research Foundation (BCRF) in advancing the landscape of cardiovascular health in our nation. BCRF's position as a prominent medical and health organization underscores its commitment to fostering transformative experiences for fellows in Bangladesh. The organization's mission, dedicated to providing a profound and impactful journey for healthcare professionals, resonates with the broader goals of our healthcare sector. By facilitating a transformative experience for fellows, BCRF not only contributes to the professional growth of our medical community but also plays a vital role in shaping the future of cardiovascular care. As we collaborate to address the challenges posed by cardiovascular diseases, the mission of BCRF aligns seamlessly with our overarching vision for a healthier and more resilient Bangladesh. Together, we strive for excellence in healthcare and a future where transformative experiences drive positive change in the lives of our citizens.

As we engage in discussions, share insights, and explore innovations during this conference, let us remember the impact our collective efforts can have on the health and well-being of our citizens. May the conference be a catalyst for collaboration, innovation, and the exchange of knowledge that propels us toward a future of improved cardiovascular care.

Thank you, and I wish you all a productive and enlightening experience.

Joy Bangla, Joy Bangabandhu
Long live Bangladesh.

Dr. Samanta Lal Sen

Message from Convener

Esteemed Guests, and Distinguished Colleagues,

It is with great pleasure and a deep sense of responsibility that I stand before you as the President of the Bangladesh Cardiovascular Research Foundation (BCRF). As we gather here today, jointly organizing this international scientific conference on heart disease in collaboration with the Interventional Academy of the United States, I extend my heartfelt greetings and congratulations to all present.

The Bangladesh Cardiovascular Research Foundation has long been at the forefront of the battle against heart disease, a silent yet pervasive threat to the well-being of our communities. In Bangladesh, the impact of heart disease is profound. Non-communicable diseases account for over 73% of total deaths, with approximately 30% attributed to heart disease alone. Our research at BCRF indicates a troubling trend of increasing severity, particularly among our youth.

Amidst these challenges, we find solace in the visionary leadership of Honorable Prime Minister Sheikh Hasina. Embracing a comprehensive action plan, she has revolutionized the healthcare landscape, recognizing the need for specialized training and higher education for our doctors. The establishment of medical colleges, hospitals, and research institutes has been a beacon of hope for a healthier Bangladesh.

Under the guidance of our Prime Minister, we witness a transformative change in the treatment of heart disease across the country. High-quality, specialized hospitals have proliferated, providing world-class technology treatment to millions of patients annually.

As we convene at this international scientific conference, let us reflect on the progress we have made and the challenges that lie ahead. The exchange of knowledge, experiences, and innovative ideas during this event will undoubtedly propel us toward new frontiers in cardiovascular care.

I extend my sincere gratitude to all collaborators, organizers, and participants who have played a pivotal role in making this conference a reality.

Thank you, and I wish you all a fruitful and enlightening conference.

Professor Dr. S M Mustafa Zaman
